All AP's are tested and working OK! AP's are unclaimed!
I have a total of 12 AP's on sale! Price is per unit.

AP's are supported in the Cisco Meraki Dashboard at least 'till 31 July 2024. So at least 5 years to go.

Product Highlights

- 2x2 802.11ac Wave2, 1.2 Gbps aggregate dual-band data rate
- Integrated enterprise security and guest access
- 24x7 real-time WIPS/WIDS and spectrum analytics via dedicated third radio
- Application-aware traffic shaping
- Integrated Bluetooth low energy Beacon and scanning radio • Self-configuring, plug-and-play deployment
- Enhanced transmit power and receive sensitivity
- Sleek, low-profile design blends into office environments
- Self-healing, zero-configuration mesh
- Optimized for voice and video

High performance cloud-managed 802.11ac wireless

The Cisco Meraki MR32 is a three-radio, cloud-managed 2x2 MIMO 802.11ac access point. Designed for general purpose next-generation deployments in offices, schools, hospitals and hotels, the MR32

provides performance, security, and manageability. The MR32 provides a maximum 1.2 Gbps data rate and supports 802.11n and 802.11ac Wi-Fi radios at 2.4 GHz and 5 GHz, and a security and manageability interface dedicated to 2.4 GHz Wi-Fi/WIPS and an integrated RF front-end. An integrated Bluetooth Low Energy (BLE) module delivers location functionality and BLE device discovery, the combination for cloud managed security. 802.11ac Wi-Fi RF front-end with scanning, security, integrated Bluetooth technology delivers the high throughput, reliability, and flexibility required by the most demanding business applications like voice and high-definition streaming video, both today and tomorrow.

MR32 and Meraki Cloud Management: A Powerful Combo

The MR32 is managed through the Meraki cloud, with an intuitive browser-based interface that enables rapid deployment without training or certifications. Since the MR32 is self-configuring and managed over

the web, it can even be deployed at a remote location without on-site IT staff. The MR32 is monitored 24x7 via the Meraki cloud, which delivers real-time alerts if the network encounters problems. Remote diagnostics tools enable real-time troubleshooting over the web, meaning multi-site, distributed networks can be managed remotely. The MR32's firmware is always kept up to date from the cloud. New features, bug fixes, and enhancements are delivered seamlessly over the web, meaning no manual software updates to download or missing security patches to worry.
