

(Senior) Business Development Manager

Locatie **Overijssel, Enschede**
<https://www.advertentiax.nl/x-1061178-z>

Micronit is looking for a (Senior) Business Development Manager (BDM).
 Micronit serves the world's leading high-tech companies and universities, producing innovative microfluidics and MEMS products. To meet these challenges, we have a growing team with a wide variety of backgrounds and experiences.

Our products can be found all over the world in DNA analysis systems or point-of-care testing solutions, they can even be found in space. We believe our strength comes through multidisciplinary teamwork and we are dedicated to unleashing your potential to make our customers successful. Have you got high-tech skills? Do you want to see where technology can take you? Then join our team!

Our unique combination of expertise in micro technologies and micromachining and commitment to quality makes us one of the most innovative producers of microfluidics and MEMS products. Micronit is based in Enschede (NL) and Dortmund (DE). We are in the process of designing a new headquarters and production location at Kennispark Station Enschede, which will be completely CO2-neutral.

Job Description

As (Senior) Business Development Manager (BDM) at Micronit you are responsible for creating and maintaining a short to medium term business opportunities support Microfluidics solutions.

You are primarily responsible for developing sales leading to increasing revenue for Micronit. You will identify new markets and applications, support sales, and develop new products. You will also be responsible for the Diagnostics and Single Analysis. In this position you will work closely together with customers.

You are commercially experienced with a strong drive to create new opportunities, develop proposals and quotations, often in close collaboration with a Project Manager, technical experts and Operations.

You bring in orders for starting design and development projects with the potential for future volume manufacturing and provide feedback from the market to various departments. In addition, you provide
