

Mechanical (Static Equipment) Design Engineer

Locatie **Zeeland, Terneuzen**
<https://www.advertentieX.nl/x-1117598-z>

For a chemical multinational we are hiring a Mechanical (Static Equipment) Design Engineer

Bedrijfsomschrijving

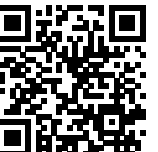

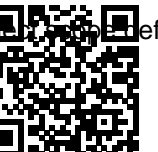

Nouvall Engineering Services is specialized in project support for the (petro) chemical and maritime industry. We provide expertise in the field of Engineering, Project Management, Maintenance, Shutdowns, Construction and Safety.

Functieomschrijving

The Mechanical (Static equipment) design engineer handles static equipment such as: pressure vessels, all types of heat exchangers (shell & tube, plate & frame, aircooled, spiral), towers including tower internals, storage tanks, silo's, hoppers, bins, etc

- Specification of new Static equipment; preparation of discipline inquiry/order packages, technical bid evaluation, follow up of technical documentation and coordination with team members from the other disciplines like process, civil, piping, instrumentation & electrical and construction.
- Design of existing Static equipment to be modified
- Assistance to trouble shooting in existing installations
- Coordinate Mechanical (Static equipment) engineering activities performed by our central engineering
