

Z.g.a.n. Fluid LUSH 3.0 142x42,5 (350 EUR)

Locatie **Zuid-Holland**
<https://www.advertentieX.nl/x-1150106-z>

Tweemaal gebruikte Fluid LUSH.
 Ik verkoop het board omdat deze niet bij mijn stijl past.

Inclusief vinnen, handle en MAX Bindingen.

Nieuw prijs €684,00

The Fluid kiteboarding LUSH 3.0 is a full Woodcore & Basalt fiber wake and freestyle board. The lush 3.0 is built for any rider who loves a very responsive Freestyle/wakestyle board. We've changed the lush from a half carbon to a full basalt fiber board. Basalt fiber is as strong as carbon but a lot less stiff. The benefits are amazing! Soft landings, insane amount of pop, similar to carbon and very responsive.

Fluid kiteboarding LUSH 3.0 has a continues rocker and 8 channels on the 3D shaped bottom. This provides maximum stability, explosive pop and precise landings. Even when riding very slow or very fast you'll be in total control.

LUSH 3.0 has been designed for high performance riding, we understand that this demands more from your equipment. Therefore we have equipped the fluid kiteboarding LUSH with power inserts which will stay in your board even when riding with boots.

LUSH has an ICP top sheet which is UV proof and scratch resistant with an amazing see trough finish

you can see the basalt fiber and colored silver flakes and details of craftsmanship clearly.

The lush 3.0 is designed for those who love high style & waves. It's a high performance board that is unmatched in the teamride. It's a neoform of a kiteboard that has been in the R & D, to develop a board that everyone can enjoy.

Asymetrical cupped fins.

Similar to the Black7 & Twoseven we included 3.5CM asymetrical cupped fins with the lush 3.0. By angling the fins the upwind performance and grip is now better than ever before! The asymmetrical shape will give you a board incredible performance when riding top speeds. The more speed, The more grip! You'll be in total control of the situation whether it's a landing, pop or just riding on very choppy water.

The Fluid kiteboarding asymmetrical fins will give you exactly what you need.
3.5cm which is perfect for riding both boots and straps! Playful yet very grippy

Basalt fiber:

Adding basaltfiber to a board doesn't only make it super strong it also helps to regulate flex. Basalt fiber will give the board stiffness which results in a more aggressive pop, snappy and responsive feel and great durability. Our basalt fiber is made from the highest quality of volcanic rock its extremely strong.

Colored silver flakes:

Colorful silver flakes make your board come alive! We are the only brand that are able to make boards with such a unique feature.

Every board is unique due to these!
