I am selling this because I got another type of tablet that fits better with the work I do in my new job. The Boox N96 Carta+ is very comfortable to read and annotate PDF files, good for note taking and you can even do some stuff like save music and navigate the internet (these last features are limited since it is not its goal). Most functions are similar to the Remarkable tablet although way cheaper and naturally a bit simpler. I used mainly to read and annotate in research articles and it was perfect for the purpose since you can read without it being tiring for your eyes. The tablet comes with its original case and pen and everything is in great condition since it hardly ever left my desk.

New is 350 plus the cover (around 400 euro)
