

Naish Aero (snow)kite set 12034 en 16034 incl. bar en kite board (200 EUR)

Locatie **Gelderland, Bennekom**
<https://www.advertentiex.nl/x-997037-z>

Naish Aero (snow)kite set 12" en 16" compleet met Slingshot bar, pomp en Airtrixx 130 kiteboard.

12" heeft geen reparaties, 16" twee nette reparaties in het doek (zie laatste foto's).

The Aero has been designed specifically with the wake/skate style, intermediate kitesurfer, and advanced wave kiteboarder in mind.

The aspect ratio and progressive foil depth will give you all the low end power you need, with the "quick pop" you want for technical air tricks. It is the perfect transition from two line kites with its superb stability and relaunching capability.

Nearly a year in the works, the Aero range has been developed with a slightly lower aspect ratio than the ARX (what we call "Balanced Aspect Ratio").

The Aero's extra wide batten reinforced tips enhances the reposnsiveness and turning speed. It also has a deeper and more powerful foil section than the ARX.

The result is a kite that combines quick and responsive handling with easy and predictable water-launchability.

These features make the Aero the ultimate "first" four-line kite. It's excellent all-round performer that most kiteboarders will never outgrow. Because of its power and water-

relaunchability, the Aero is also the best choice for four-line wakeboarders, or waveriders.

It may not provide the all-out bang-time of some higher-end designs, but, for a keyboard that is all-around performance and ease of use, the new Hero is designed to become the choice of amateurs and professionals alike. We ask Chao Chen, who won both Asia and U.S. keyboarding events with the:
