Product Description

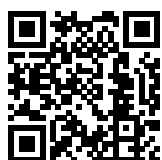

Use of this OEM System Builder Channel software is subject to the terms of the Microsoft OEM System Builder License. This software is intended for pre-installation on a new personal computer for resale. This OEM System Builder Channel software requires the assembler to provide end user support for the Windows software and cannot be transferred to another computer once it is installed. To acquire Windows software with support provided by Microsoft please see our full package "Retail" product offerings. From the Manufacturer

Your all-in-one network solution designed and priced for small businesses with up to 75 users. SBS 2011 Standard delivers enterprise-class server technology in an affordable, all-in-one solution. SBS 2011 Standard helps protect your business information from loss by performing automatic daily backups. Additionally, it allows users to be more productive with features such as e-mail, Internet connectivity, internal websites, remote access, and file and printer sharing.

Simplify Small Business IT: From one administrative console, get a comprehensive view of the health and security of PCs and servers in a business environment, making it easier to manage common IT tasks and address technology issues before they occur. SBS 2011 Standard ensures that each PC on the network is secure by automatically managing the Windows firewall on business servers and PCs and configuring them to best practices. It responds to changing business conditions with the flexibility to adjust email to the organizations needs and a simplified way to help keep e-mail continuously available for end users.

Microsoft Small Business Server 2011 Standard incorporates a best-of-breed, off-the-shelf product from the industry's leading technology vendors, including Microsoft Exchange Server 2010, SharePoint Foundation 2010, and Windows Server 2008 R2 Service Pack 1. The complete solution environment includes all the tools and features that small businesses need. SBS 2011 Standard supports critical line-of-business applications and run them on a secure award winning platform. Get things done from virtually anywhere, anytime. With Office Web Apps users can view, create and edit documents anywhere with an Internet connection. Plus, new and improved Remote WebAccess enables easy connection by taking advantage of Windows SBS 2011 Standard enterprise class e-mail, contacts, calendars, and communications with new Microsoft Exchange Server 2010 Standard.

Help Protect Business Data Automatically backup files with features that enable businesses to store
