## Windows Server 2012 R2 Standard OEM (199,99 EUR)

Limburg, Heel Locatie https://www.advertentiex.nl/x-1002545-z

With Windows Server 2012 R2 you execute your most important work volumes with powerful recovery options. You benefit quickly from various, cost-effective storage options with high performance and simplified delivery of IT services for multiple users. You can build applications on location and in the cloud, implement, manage and monitor. And with a Server 2012 R2 Standard license you give users secure access to company resources from any device.

The benefits of Server 2012 R2 standard

Windows Server 2012 R2 forms the basis of Microsoft's server operating systems. Server 2012 offers IT professionals and system administrators endless possibilities. A Windows Server 2012 is perfect for companies with physical or minimally virtualized environments. Various new and improved technologies are implemented in Server 2012.

The first advantage is the ability to create server groups that can be managed via the new UX. This feature allows you to manage tasks from each server with common characteristics and provide specific information about all servers in the group. Data deduplication has also been implemented. This function finds and deletes duplicate data, while the data remains correct and complete.
