

# Windows Server 2016 - 50 User Remote Desktop Service RDS Cal (4.500 EUR)

Locatie **Utrecht, IJsselstein**  
<https://www.advertentienx.nl/x-1002547-z>

=====

## Product Informatie:

Na betaling ontvangt u vrijwel direct de licentie waar mee u 50 RDS User CALs kan activeren voor elke versie van Windows Server 2016.

Prijs is incl btw, u ontvangt hier uiteraard een factuur bij.

=====

Microsoft Windows Server 2016 RDS CAL's - vereist voor het gebruik van Remote Desktop Services; stelt uw gebruikers in staat altijd en overal en vanaf elk apparaat te werken, mits toegang tot netwerk of internet.

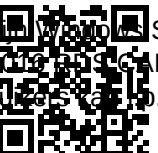

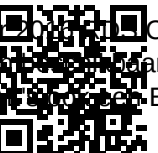

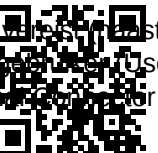

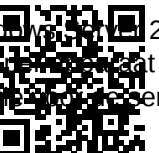

?Maakt virtual desktop infrastructure (VDI), session based desktops en applications (RemoteApps) mogelijk.

?Virtuele desktops en applicaties draaien op de netwerkserver en kunnen dus makkelijk centraal beheerd worden.

?Gebruikers hebben zo altijd en overal toegang tot hun applicaties (bijvoorbeeld Office), data of virtuele desktop.

?Gebruikers kunnen zo vanaf nagenoeg elk apparaat werken (bijvoorbeeld thin clients of iOS of Android apparaten).

?Remote Desktop Services is inbegrepen (aparte server role) in Windows Server 2016 Standard of

|                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                           |
