

# Alarm autonome MA89 (45 EUR)

Locatie **Gelderland, Tonden**  
<https://www.advertentiax.nl/x-1005313-z>

Alarm autonome ma89 beschrijving : dit alarm is autonoom, compact en eenvoudig te installeren. Het beschermt uw woning of andere ruimtes. Steek het in een stopcontact, sluit het aan op telefoonnet en klaar is kees! Het systeem beschermt u dag en nacht. Zodra iemand uw woning binnendringt, gaat de ingebouwde sirene van 130 db en wordt een ingesproken alarmmelding (van max. 6 Seconden) verstuurd naar max. 3 Telefoonnummers. De ingebouwde sirene kan worden uitgeschakeld; in dat geval wordt alleen de telefonische melding verstuurd.

Ik heb er nog 2 per stuk 45 samen voor 75

|                                                                                                                                                                                                                  |                                                                                                                                                                                                                   |                                                                                                                                                                                                                   |                                                                                                                                                                                                                   |                                                                                                                                                                                                                    |                                                                                                                                                                                                                     |                                                                                                                                                                                                                     |                                                                                                                                                                                                                     |                                                                                                                                                                                                                     |                                                                                                                                                                                                                     |
