

Mechatronics Design Engineer, Veldhoven Veldhoven

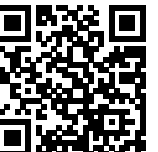

Locatie **Limburg, Heel**
<https://www.advertentiax.nl/x-1012694-z>

Work in multidisciplinary project teams, aimed at design of the system's dynamic architecture/vibration control module with the following responsibilities:

- Optimizing design using predictive modeling techniques
- architectural design and perform trade-offs between mechanical, electronic and software solutions
- technical budget analysis
