

# QNAP TS-879U-RP met Core i7 3,4GHz upgrade (699 EUR)

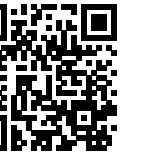

Locatie **Noord-Holland, Hilversum**  
<https://www.advertentiax.nl/x-1015463-z>

NAS-server met 8 rekken en ultrasnelle prestaties (met processor update en fluisterstille fans)

De TS-879U-RP is een robuust netwerkopslagcentrum dat ultrasnelle prestaties levert en zeer betrouwbaar is. Het biedt flexibele opslaguitbreiding en data wordt zeer goed beveiligd. Dit maakt de TS-879U-RP een betrouwbare NAS voor het opslaan van grote hoeveelheden data en het optimaliseren van de efficiëntie van de zaak.

- Bestanden beheren en delen in een gecentraliseerde opslag.
- Back-up bedrijfsdata met gecodeerde replicatie op afstand, Real-time Remote Replication (RTRR), en cloud gebaseerde back-up.
- Faciliteer het gebruik van iSCSI en het virtualiseren.
- Beveilig data met AES-256 codering van het volume, toegangscodering, en automatische blokkering van IP-adressen op basis van beleid en nog veel meer.
- Vergroot de efficiëntie dankzij de ondersteuning van Windows AD/LDAP, Windows ACL en.

|                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                              |
