Rockford Fosgate 301X car amplifier 900 watt amp

The Rockford Fosgate Punch 301X slams your speakers with a one-two combination, forcing them to deliver their best possible performance. Part one: power. The clean circuit design, MOSFET output stages, and proprietary technology inside the 301X bring out extraordinary detail in your music, driving your speakers with clarity and strength you just can't get from an in-dash receiver - or a lesser amp. Power four full-range or component speakers with 40 watts RMS per channel, or bridge the amp to 2-channel operation - you'll get 150 watts per channel! You need more than mere muscle to create the sound you want; that's why Rockford Fosgate has included high- and low-pass crossovers, allowing you to tweak the frequencies you send to your speakers.

Description
