2 x Cisco WAP 321 Wireless-N Access Point with Single Point Setup

Flexible, High-Performance Wireless ConnectivityThe Cisco WAP321 Wireless-N Selectable-Band Access Point with Single Point Setup is a sleek, affordable, and easy-to-deploy device that delivers fast, highly secure wireless connectivity. It supports high-speed connections with Gigabit Ethernet LAN interface for demanding applications. The Cisco WAP321 bridges wired LANs together wirelessly, making it easier for small businesses to expand their networks.

Feature and CapabilitiesWith the Cisco WAP321 Wireless-N Selectable-Band Access Point, you can easily set up highly secure wireless and wired guest access. Among its other benefits, this access point:

- Offers compatibility with Cisco Small Business Gigabit Power over Ethernet Injector and 12V Power Adapter
- Provides selectable-band (2.4 or 5 GHz) wireless-N connectivity for optimal performance
- Support Single Point Setup controllerless multi-access point deployment and management technology
- Safeguards business information with enhanced security
- Connects to Power over Ethernet (PoE) devices, simplifying installation and reducing wiring
