Unlike Windows CE 1, you get printing support for a selection of printers, via cable or IrDA infrared, or via Windows using True Type fonts. Print preview multiple pages at a time. Printing not as satisfactory as in 5.

Sketch

Drawing tools, using stylus provided with Psion. Clipart library, zoom, resize. This is a paint (pixel oriented) drawing package, not a vector oriented package.

Calendar (called Agenda on the Psion)

Time management, with day, week, month and year views and alarms. Attach notes, sketches, sound. To-do items. Very powerful. Busy view of month added.

Database

Card view of records, list view of multiple records, embed sketches, sound or objects, sort.

Record

Record voice and sounds, even with case closed. Store 2 minutes per megabyte with compression, up to 4 minutes with ADPCM.

Calculator

Four function with "tape". Scientific, multi function, with ten memories. Use touch screen if desired. Under Extras Bar. Psion has this on the silk screen bar.

Time

Select sounds or recordings for alarms, local times in 700 locations, add your own. Flexible multiple alarms. Daylight saving.

PC Docking

Serial cable with Honda connector. Windows 95/NT PsiWin2 conversion program included, Psion appears as an icon in Windows.

Programming language

OPL built in.

Communications

VT100 and TTY terminal emulation, ASCII, Xmodem, Ymodem protocols. Free Message Suite software provides fax, limited web browser, email.

Jotter (added to 5mx)

Quick data derived jotter application for ad hoc notes. Under Extras Bar. Psion has this on the silk screen bar.

Contacts (added to 5mx)

vCard compatible contacts list, works with.
