

Toyota C-HR 1.8 Hybrid Executive 122pk CVT 2018 Grijs (23.750 EUR)

Locatie

Noord-Brabant, Eindhoven

<https://www.advertentiex.nl/x-1050145-z>

Hello!

Our car is for SALE! We are private owners.

My wife's father bought it around 2 years ago (June 2018) in Hungary. We are expats, so given we live in the Netherlands we brought the car with us in September 2018. We registered it with the RDW under my wife's name, so now it's a fully Dutch car with RDW paperwork and it serves us EXTREMELY well since then.

Every year we bring it to the Toyota garage in Eindhoven for mandatory checks. It's almost a new car. It never had ANY problems or service need besides the obligatory service need. Currently there is around 45.000 km in it only. Given it's almost a new car the APK is valid until 27 June 2022!

It's an Hybrid - so you ride environment friendly and you save a LOT on benzine cost. Consumption depends on speed and your leg :) Can be 4.1 on average on 100 km or can be 6.3. If you with 155 then it will definitely consume 8 liters.

So just use it in the Netherlands, keep the speed limits and I 'guarantee' you will have extremely low fuel consumption.

It's an EXECUTIVE model, so rather good looking on the outside as well as on the inside. Has no GPS because we have been using our mobiles always, but it can be added in any Toyota garage for around a 1000 euros if you need it...

Has smart key system, park-assist self-parking system, cruise control (adaptive too), LED front and back lights, partly leather seats and dashboard, dead space monitoring system on the mirrors, lane departure indicator, fog lights, rain sensor, automatic high beam, 18-in alloy wheels, automatic folding mirrors, anti-

glare inside mirror, seat heating and steering wheel heating, adjustable steering wheel, engine and hybrid
 V-6 240-hp, factory-original, 18-in. summer tires and less than 2,000 miles. Pirelli P-Zero 3
 P-Zero 3 RFSZ 240-hp winter tires, snow chain, Anti-lock Braking system, ABS, Electronic Brake
 force Distribution (EBD), Vehicle-Stability Control (VSC), Brake Assist (BA), 150-lb impact absorbing
 seat belt and driver's air bag, passenger air bag, LED Daytime Running Light, auto-dimming
 conditioning, Hill Assist control, parking assist and camera

It has Continuously Variable Transmission (CVT) which is an automatic transmission that changes seamlessly through continuous range of gear ratios to create strong and extended acceleration along with improved fuel economy. It could be quite loud vs other automatic transmissions so don't be surprised by that sound. It's the CVT :). But it is more reliable too than other cars with automatic transmission.

Given the language difference I dont take accountability if the description is not correct - but we can double check anything together in a Toyota garage for free.

We pay 64 EUR MR belasting for it. So hope you are interested, if yes, please contact me and we can discuss a meeting.

Please only contact me if you speak English and if you are willing to help me throught the documentation and selling process - so be patient with me, I am a first time seller :)

Cheers,
