

## Eetbare Pompoenen

Locatie **Noord-Brabant, Sint-Michielsgestel**  
<https://www.advertentiax.nl/x-1056255-z>

Ja ja de eerste zijn er weer! Met dit jaar nog meer verschillende soorten. Al vanaf 20 cent per stuk. Allen erg scherp geprijsd !

Een aantal van de nieuwe rassen die dit jaar aan ons assortiment toegevoegd zijn:

Turkischer Bergkurbis: De bekendste turkse eetpompoen!

Favoritamix: Een mix van oranje, witte en zwarte pompoentjes. Heerlijk van smaak!

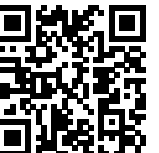

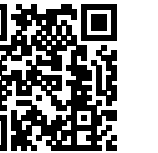

Melly Yellow. Een felgele Halloween pompoen die zelfs eetbaar is.

De Pindapompoen: Een pompoen die zowel eetbaar als uitermate geschikt voor decoratie is. Zoals de naam al zegt zit de huid van deze pompoen vol met 'pinda's'  
 Alle pompoenen zijn raszuiver en zullen daardoor hun smaak nooit verliezen.

De kraam is 7 dagen per week geopend en is zelfbediening.

ADRES: HORZIKSESTRAAT 12, SINT-MICHIELSGESTEL.

De goedkoopste in de!

|                                                                                                                                                                                                                         |                                                                                                                                                                                                                          |                                                                                                                                                                                                                          |                                                                                                                                                                                                                          |                                                                                                                                                                                                                           |                                                                                                                                                                                                                            |                                                                                                                                                                                                                            |                                                                                                                                                                                                                            |                                                                                                                                                                                                                            |                                                                                                                                                                                                                            |
