HITEC Power Protection is searching for an Innovation, Development & Engineering Manager
 HITEC Power Protection develops, manufactures and delivers turnkey power solutions to ensure uninterrupted, continuous and conditioned power supply to mission-critical processes. The core product of HITEC Power Protection is the dynamic UPS (Uninterruptible Power Supply) system using flywheel energy storage. This is a proven technology, based on more than 60 years of experience and supported by a global installed base of more than 2,000,000 kVA in high demanding industries. Besides the main engineering and assembly facility in Almelo, the Netherlands, HITEC is located in the United States of America, United Kingdom, Malaysia, Spain, Taiwan, China, and Russia.

HITEC's core values are: customer focus, ownership, quality, safety, reliability and communication.

We guarantee a good, open minded and tolerate work environment. We are striving for a pleasant and fulfilling collaboration between customers, colleagues and the organization.

The Innovation, Development & Engineering (IDE) Manager leads and manages engineering activities in Innovation, product development, design, operations or field service environments. He manages a group of engineers and designers working on various projects. The Engineering department consists of three divisions: Electrical, Mechanical and Software. Each division has their own Lead Engineer, with a team of four to eight employees. The IDE Manager reports directly to the COO.
