For all-out racing performance, you can't beat MSD's multi-channel ignition systems. These digital ignition controls deliver incredible power and offer versatile programming features. Top racers and teams, rely on the power and programming options of the MSD multi-channel system! Precise ignition timing is essential to produce maximum horsepower. However, one timing setting is not ideal for an engine's entire RPM range. The dynamics of air and fuel flow into the engine as well as the speed that the piston travels through the combustion stroke all affect the ideal timing setting. Fortunately, the programmable MSD Ignition lets you tune in a custom timing curve to match your engine's requirements! The multi-channel racing ignition kits are supplied with all the parts needed for your application, CD coils, trigger pickups, spark plug wires, rev control, flywheel and trigger plate. High output CD sparks improved top end power improves throttle response and idle quality. Incredible spark energy and voltage
