Thales is searching for a Technical Subcontract Manager
In fast changing markets, customers worldwide rely on Thales. Thales is a business where brilliant people from all over the world come together to share ideas and inspire each other. In aerospace, transportation, defence, security and space, our architects design innovative solutions that make our tomorrow's possible.

Job Description

As a Technical Subcontract Manager you work in an international multidisciplinary team. You are responsible for managing the technical part of a specific system segment and/or subsystems that will be subcontracted. You closely collaborate with the commercial subcontract manager, the system architect and engineering team. Activities include amongst others:

- Perform requirements decomposition towards subcontracted items;
- Prepare technical documentation, including SoW and TA for the subcontractor;
- Monitor and control the technical compliance of the subcontractor;
- Monitor the technical progress of the subcontractor according to the agreed milestone planning;

Review and validate the deliveries according to technical specifications;
Work closely with the system architect and engineering team to ensure the technical part of the system is correctly implemented;
Act as the main contact point for the subcontractor for all technical issues;
Coordinate the technical part of the subcontract with the commercial subcontract manager and the engineering team;
Organize and participate in technical meetings with the subcontractor and the customer.

The Technical Subcontract Manager has demonstrable experience in the naval domain and is a specialist in Bi/multi-Static Towed Array Sonar, Tactical Data Link, ESM, Naval surveillance radar and / or multi-function radar or Navigation.
