Functieomschrijving

The role:

You will work on a broad variety of tasks in the field of Interior, such as accommodation, insulation, floor covering, various ship-specific living and working spaces, etc. You Can be involved from the first proposal until final delivery. Works in a team of several engineers and implements technical and practical knowledge into the design and takes care all relevant data is stored accurately in the PDM-system.

Contributes to the engineering process by developing the required deliverables, such as (technical) specification documents, functional descriptions and test/validation plans, and by reviewing supplier

documentation.
 - Develop capabilities
 - Provide (functional, technical specifications for suppliers and subcontractors) upon technical and design requirements. Performs technical evaluations or quotations from suppliers and subcontractors
 - Close cooperation with the purchasing department. Ensures full compliance to all applicable requirements imposed by customer and regulatory bodies. Engages in technical discussions to achieve comparable levels of compliance for competing suppliers of the same product/system; (providing a good starting point for the commercial negotiation). Can defend technical solutions and communicate these with stakeholders. Acquisition and review of supplier engineering information/documentation, (i.e. arrangement and detailed drawings, calculations, diagrams, etc.). Responsible for integration of delivered
