

Juniper Networks EX4200-48P Ethernet Switch with Virtual (249,01 EUR)

Locatie **Friesland, Drachten**
<https://www.advertentieX.nl/x-1079902-z>

48-port 10/100/1000BASE-T (48 PoE ports) + 930W AC PSU Including 50cm Virtual Chassis cable
 EX4200-48P Overview:

The EX4200 switches with Virtual Chassis technology combine the availability and reliability of modular systems with the economics and flexibility of stackable switches, delivering a high-performance, scalable solution for data center and campus environments.

High-performance businesses demand high-performance networking solutions. These solutions include a new class of secure, scalable and always-on enterprise switch that advances the economics of networking by enabling businesses to deploy innovative new technologies that increase revenue and improve productivity. The Juniper Networks EX4200 line of Ethernet switches with Virtual Chassis technology combine the compact, pay-as-you-grow economics and low power and cooling requirements of stackable switches with the performance, availability, operational ease and port densities of chassis-based platforms to meet the demands of today's high-performance enterprises.

The Juniper Networks EX4200 line of Ethernet switches with Virtual Chassis technology combine the high availability (HA) and carrier-class reliability of modular systems with the economics and flexibility of stackable platforms, delivering a high-performance, scalable solution for data center, campus and branch office environments.

Offering a full suite of Layer 2 and Layer 3 switching capabilities as part of the base software, the EX4200 switches support a variety of applications, including campus and data center environments. As a 48-port or 48 PoE switch, the EX4200-48P has been designed for high-density deployments. As required for growth, Juniper Networks Virtual Chassis technology enables the deployment of multiple EX4200 switches to be managed as a single device, delivering a scalable, pay-as-you-grow solution for expanding network environments. Flexible Gigabit Ethernet (GbE) and 10-Gigabit Ethernet (10GbE) uplink options enable high-speed connectivity to aggregation or core layer switches which connect multiple floors or buildings.

All EX4200 switches include HA features, such as redundant, hot-swappable internal power supplies and field-replaceable, multi-blower fan trays to ensure maximum uptime. In addition, the base EX4200 switch models offer Class 3 Power over Ethernet (PoE), delivering 15.4 watts on the first eight ports to support

networked devices such as telephones, video cameras and wireless LAN (WLAN) access points for low-density converged networks. Full PoE options delivering 15.4 watts on all 24 or 48 ports are also available, making them ideal for high-density IP telephony deployments.

Productstaat van de Juniper Networks EX4200-48P Ethernet Switch with Virtual Chassis Technology

Het product ziet er goed uit.

We checken de hardware bij uitlevering zodat u verzekerd bent van een goed werkend apparaat. Alle producten die wij uitleveren hebben 1 jaar garantie.

Je kunt betalen op onze webwinkel met Creditcard, PayPal, Apple Pay, Google Pay, Bancontact en iDeal. Tevens kan je achteraf betalen met Klarna (14 dagen). Kies de betaalwijze die voor jou het gemakkelijkst is!

Voordelen van Hardware Kings

- Deskundig en ervaren personeel met de beste service
- 14 Dagen Bedenktermijn
- Niet goed = Geld terug
- Minimaal 1 jaar garantie
- Uitsluitend A Merk refurbished hardware
- Op werkdagen voor 16:00 besteld is dezelfde dag verzonden!
- Levering uit eigen voorraad
- Veilig betalen! met SSL verbinding
- Aantrekkelijke aanbiedingen
- Groot assortiment
- Haastige spoed? Bestel voor 11:00 uur en selecteer Same Day Delivery voor avondlevering!
- Ruime Openingstijden

Gratis verzending in Nederland & België vanaf €,-
