Assisted client roaming

Assisted client roaming is een belangrijk aspect van een draadloos netwerk. Het zorgt ervoor dat de draadloze gebruikers van een netwerk kunnen overstappen naar een ander draadloos netwerk zonder dat de draadloze verbinding onderbroken wordt. Dit is vooral belangrijk in omgevingen waar draadloze gebruikers veel bewegen, zoals in een winkel of een kantoor. Power over Ethernet

Power over Ethernet is een technologie die het mogelijk maakt om draadloze access points te voeden via een Ethernet-kabel. Dit is vooral handig in omgevingen waar draadloze access points nodig zijn, maar waar geen stroomkabel beschikbaar is. Power over Ethernet zorgt ervoor dat de draadloze access points kunnen worden geïnstalleerd zonder dat er extra stroomkabels nodig zijn.
