Alfa Romeo 156

This car has been off road for the last year, i kept it in a garage.

Unfortunately i no longer have the space need to keep it which is why i have to sell it.

The suspension has been upgraded to Bilstein b14 coilovers(1.5 year ago) they are in like new condition, the set if fully adjustable from 30 to 50 mm

The car also has upgraded 4 piston 330 bremsa brakes which dramatically improve the braking.

In the front it has a Sparko strut bar which further improves the chassis and helps the car corner better.

The car has a TI interior in excellent condition to, the seats are very comftorble .

The car has a Zender body kit on it and a Stainless steel exhaust box and pipe , which makes this car sound even better

I installed a new car battery and two rear control arms for the suspension a month ago.

Alloys are good, not scratches or dents on them, and tires are like new.

No majour rust parts in this car
