Er brande wel allerlei lampjes. Lijkt me een hoopvolle indicatie over de werking. Wat ik nog op internet vond:

Samsung Officeserv 7100 Telephone System rond 2007, ebay new 300

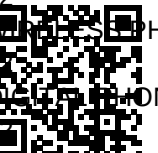

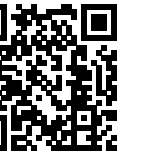

The Samsung OS7100 System is a small business telephone system that has the same powerful features as the larger telephone systems on the market!

The Chassis has three slots which allows for cards to be interchangeable.

This Package also comes with the MP10 Processor module which is the main processing module for the system.

In addition there is also a MMC+ card that allows for data and settings to be stored and connected to a PC when they need to be altered.
