

## Ducati 1098 kroonplaat - Speedymoto SBK Top Triple Clamp (225 EUR)

Locatie **Noord-Holland, Oostwoud**  
<https://www.advertentienx.nl/x-1093637-z>

Speedymoto Ducati 1098 kroonplaat, cnc gefreesd uit hoogwaardig biliet 6061 aluminium (nieuw nog in de gesealde verpakking)

**SPEEDYMOTO DUCATI SUPERBIKE TOP TRIPLE CLAMP - 1098 - BLACK**  
 Part no. 03-0244BLK

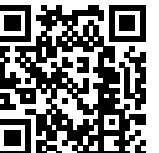

The SpeedyMoto top triple clamp is a market innovation. CNC machined out of biliet 6061 aluminum, not only is our triple clamp stronger than the stock Ducati unit, but 6061 is extra lightweight. Besides the added strength, our distinctive gull-wing design offers multiple advantages over the stock unit and the other triple clamps available in the market:

Offers up to 20mm (~3/4") of added height to the stock clip-ons, providing better ergonomics and control. Further enhances ergonomics by offering a 15 degree range of bar sweep from the stock clip-ons. Strengthens the front end by spreading the top clamping points of the forks further away from the lower clamps, reducing fork flex.

Fits all 1098 models with Showa or Ohlins forks

To fit: Ducati 1098 / 1098S / Tricolore '07+

Nieuw nog in de gesealde verpakking!

|                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                            |
