The iPhone 4S was a phenomenal mobile phone that changed the way Apple is right now. So, I thought of preserving the retro smartphone into a beautiful artwork. All the components in the frame belongs to the same iPhone 4s and is all original. Along with that, the frame is a wooden frame with White LEDs built in which can also be light up. A total of 40 components inside the frame and the same can be seen on my Youtube channel "Athem Saurav;".
