

## Junior Allround Onderhoudsmonteur Industrie, Aalsmeer - Aals

Locatie **Limburg, Heel**  
<https://www.advertentiax.nl/x-1117611-z>

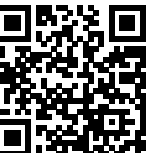

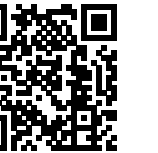

Bedrijfsomschrijving:

Locatie: regio Aalsmeer

Wegen sterke groei zijn we op korte termijn op zoek naar een Junior Allround Onderhoudsmonteur. We zoeken iemand die het als een uitdaging ziet om complexe storingen en problemen aan installaties en machines op te lossen. Het machinepark moet optimaal kunnen presteren en daarom is goed onderhoud belangrijk. Ook dit wordt een van de taken van de Junior Allround Onderhoudsmonteur.

We zijn van oorsprong een...

|                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                 |
