The MSD 8.5mm super conductor wire is the performance wire. Engineered from the inside out, the 8.5 offers everything you have ever wanted in a wire; incredibly low resistance without electronic interference. In a single 12 inch length of super conductor wire there is only 40 - 50 ohms of resistance. That is the lowest resistance of any helically wound wire. To accomplish this, we use a copper alloy conductor due to it's great voltage carrying capabilities. The low resistance results in less loss in spark energy so more reaches the spark plug. The conductor is wound extremely tight around a special center core. So tight in fact, that there is over 40 feet of conductor wrapped into a single foot of plug wire. This winding procedure, combined with a ferro-magnetic impregnated center core, produces an extremely effective electro magnetic interference (EMI) or choke. This choke, or suppression capability, keeps the EMI inside the wire where it cannot interfere with other electronics on your vehicle. The outer sleeve that surrounds the conductor assembly is just as impressive. A proprietary blend of silicone and synthetic material produce a sleeve that is highly resistant to high heat as well as abrasion and tears. Available in universal kits and bulk lengths. Resistance less than 50 ohms/ft. for superior sparkExtra hvy glass braid; strong dielectric insulatorHelically wound copper alloy conductor40 Feet of conductor wound in one foot of wire8.5mm jacket protects from high heat or abrasionSilicone and synthetic heat resistant bootFerro-magnetic impregnated core creates EMI chokeCore made with DuPont kevlar to add tensile strength

Gooze Nederland

Gooze is de leverancier van performance USA auto onderdelen in de Europese Unie. Wij verzenden vanuit Nederland uw bestellingen wereldwijd. Ondanks dat wij trots zijn op de kwaliteit van onze producten, zijn deze niet geïmporteerd door de Nederlandse douane. Het is daarom mogelijk dat u in staat bent om de producten te importeren.
