Mini itx gaming pc, assembled during corona, used for only 5 months.

Excellent PC for gaming or video editing, can handle whatever you push at it. Easily upgradable and already somewhat up to date. Just missing a GPU upgrade then it's all set. The GTX 1060 served me well, because I only have a 1080p monitor, didn't make sense upgrading my GPU without upgrading my monitor first. DM for more info.
