Free cargo tricycle with some problems. Needs more love than I'm willing to give it, so feel free to come pick it up as is. No guarantees, no return.

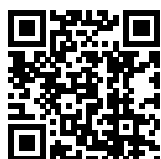

It has a wrong nut for the rear left wheel which makes it rub against the body and slow down. I was not able to find a replacement, and bike shops won't fix it, so you'll probably have to fix it yourself.

The dirt showing in the pictures is not rust and cleans away easily. The chain cover is roughed up but can be bent back into shape. The wheels are deflated but held air well last time they were.
