Introducing VK-Q1, a brand new Music Bluetooth Handsfree Car Kit from Viseo. VK-Q1 continues the elegant and simplified design of CK series car kit with essential functions to bring you a highly advanced Bluetooth communication and entertainment device that works perfectly with your car.

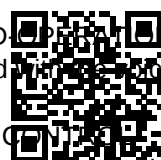

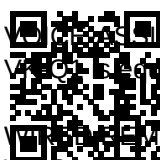

VK-Q1, NEW DESIGN, NEW STYLE, AND NEW EXPERIENCE

VK-Q1 has incorporated the latest Bluetooth chipset to bring you fast connection, better compatibility and specially designed media keypads for music playing together with advanced noise and sound distortion reduction technology.

Our designer study and tried numerous of designs and the result are the stylish wired remote control painted in shiny black piano paint finish. It is not only easy to operate but also cool to use.

BLUETOOTH TECHNOLOGY

VK-Q1 have adopted the popular Bluetooth 2.0 technology and enables user to multiple pair up to 4 handsets. Once paired user's phone will automatically reconnect with VK-Q1 every time user enter the car and starts the engine.

VK-Q1 is equipped with the menu to make you operate easily while driving.
 VK-Q1's wired remote control is design to allow driver to access easily. The stylish look with one of the handlies user interface for music Bluetooth car kit.

STEREO MUSIC & FM TRANSMISSION

VK-Q1 comes with A2DP & AVRCP Bluetooth profiles that allows user to access the music stored in the phone to be played out on the car radio via the built-in FM transmitter. There are three preset channels which also allows user to set and memorize their preferred frequency.

KEYPAD BACKLIGHT

The color keypad backlight enables users to operate VK-Q1 at night without any difficulty.

OTHER FEATURES

The voice dial activation is another useful feature that allows user to dial out by saying the name stored in the phone. Moreover, VK-Q1 supports last number redial, call hold and call waiting, and more.

EASY UPGRADE

New phones are introduced every quarterly and user can easily keep their VK-Q1 up-to-date to be compatible with these phones by upgrading the Bluetooth firmware. VK-Q1 provides a simple way of upgrade. Simply use a Mini USB to USB cable with Viseeo upgrade platform software to upgrade VK-Q1.

CAR SPEAKER INTEGRATION

VK-Q1 accessory ISO cable allows car kit to be connected to the radio speakers. In operation VK-Q1 will automatically mute radio when dialing out or receiving call and un-mute the radio when finish.
