More specifications

The Samsung SyncMaster T24C300 is a 23.6 inch monitor with 1920x1080 resolution. The pixel density of 93 ppi means that programs are usable without the need for image scaling. The monitor uses a TN panel. Usually not the best choice for color fastness, but usually the best technique for good response times. Samsung promises a maximum brightness of 250 cd / m², a contrast of 1000: 1 and a response time of 5 ms. The screen offers HDMI as a digital connection. Thanks to the integrated USB hub, you can connect peripherals such as mouse and keyboard via the monitor.
