Offered for sale: Mining Rig 365 MH/s with x6 RTX 3070.

Built on 14.04.2021. All components were new and sealed. All invoices, warranties, and boxes are available (from cables, to GPUs).

Currently mining Ethereum on Minerstat (MsOS) with 100% efficiency. Works stable, with low temperatures and noise + it looks wonderful.
Power consumtion is ~710 W on the software, and ~800 W on the wall (with all fans on).

The GPUs used are all high-end models/brands, with great resell value.

"Why do you sell if it's so profitable?" -> I enjoy creating new projects (miners).

Please feel free to ask anything around this mining rig.
I accept payment via bank. The rig is available to be picked up only (+checked/tested).
Change the wallet and it is ready to mine for you (that easy).
I am looking forward to receiving your bids/offers (I do not respond to non-sense questions and bids; please check the market before).

It goes immediately for 10000.

If you see other miners that perform 360-370 MH/s (maybe a low-cost build), please check and compare the components used before placing an offer or pointing prices in a private message.

Thank you for your understanding and interest in this mining!
