

## LG 27 UltraFine 5K IPS - Retina (218 ppi) Cam amp Speakers (1.000 EUR)

Locatie **Utrecht, Utrecht**  
<https://www.advertentiax.nl/x-1170633-z>

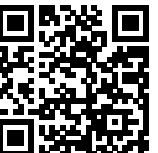

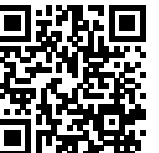

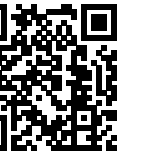

Superfijne monitor, retina screen (218ppi) met ingebouwde Cam & Speakers.  
 De monitor is ook een USB-hub, een enkele USB-C kabel naar je MacBook volstaat; de monitor voorziet ook je MacBook van stroom.  
 Het geheel werkt Plug&Play.  
 Verstelbaar in hoogte en kantelbaar.

Gekocht in January 2020.  
 Nieuwprijs Euro 1399.  
 Zo goed als nieuw, geen beschadigingen en geen dead pixels.  
 Heb nog de originele doos en originele factuur.  
 Gekocht toentertijd bij Apple.

Monitor is een buitenkansje, helemaal nu retina schermen niet tot nauwelijks te krijg zijn vanwege algehele display schaarste.

Type 27MD5KL  
 27"

|                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                              |
