Superfijne laptop (goede maat, snel en lichtgewicht) maar voor het thuiswerken een pc gekocht en daardoor wordt hij helemaal niet meer gebruikt. Haast geen gebruikerssporen omdat hij altijd in een beschermende hoes gebruikt is. Ook het toetsenbord is altijd gebruikt met een silicone afdek er overheen (zit erbij als je wilt). Clean install gedaan en macOS Mojave er op gezet voor de nieuwe gebruiker.

Een paar mankementen:

- De batterij gaat minder lang mee dan toen hij net nieuw was. Ik schat ongeveer 5-7 uur. Wel afhankelijk van het type gebruik (M.a.w., als je een film aanzet of i.d., dan iets korter denk ik).
- Het scherm is licht beschadigd door de silicone toetsenbordafdekking. De beschadiging is eigenlijk alleen te zien als het licht in het beeld weerspiegelt. Als de laptop aanstaat zie je het eigenlijk niet, wel als het licht weerspiegelt en het scherm zelf donker is. Op de laatste foto kan je dit zien: je ziet de letter E van het toetsenbord op het scherm staan.
- Het snoer van de adapter heeft een beschadiging. Adapter doet het verder prima.

Verder is de laptop echt in zeer goede staat.

NB: Ik heb nog een paar thunderbolt naar HDMI kabels (van verschillende lengte) die ik erbij zal doen. Zie verder mijn andere advertenties voor overige accessoires.
