Ultra V3 9m2 2020 Like new, used 8x, 690 euro
 Ultra V2 14m2 ask

Foil and lightwind freeride/wave

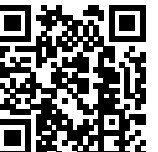

Unique combination of stability & responsive drive. High performance lightweight single strut geometry.

The Ultra has yet again proven to be unbeatable for lightwind freeride performance, foiling, and wave riding alike. The exclusive Airush Load Frame, segmentation reduction through the canopy, and lightweight single strut geometry all contribute to increased durability and responsiveness.

LIGHTWEIGHT SINGLE STRUT GEOMETRY

The Ultra V3 is designed to maintain its shape and responsiveness by maximising the benefits of the unique Airush Load Frame. The balanced geometry combines canopy curve, leading edge sweep and a specific trailing edge concave.

By reducing the number of struts and combining this with WebTech smart reinforcing the weight of the Ultra V3 is minimised. This enables a greater level of performance in all wind conditions and allows us to push the boundaries of light wind performance.
