

TP-Link DECO M5 WiFi mesh (set van 3)

Locatie

Noord-Brabant, Berkel-Enschot

<https://www.advertentiex.nl/x-1177400-z>

vanwege een upgrade aan mijn thuisnetwerk bied ik mijn prima TP-Link deco M5 WiFi mesh te koop aan. Deze is ongeveer 1,5 jaar bij mij in gebruik geweest en werkt naar behoren. Alles is weer teruggezet naar factory default. Het gaat om een set van drie deco M5 devices. Dus de app installeren op je telefoon en zo weer instellen. Zonder verpakking en zonder handleiding want die heb ik niet meer. Te gebruiken als router (inclusief antivirus en parental controls) of gewoon als losse AP's (mesh) via de Deco app.

van de fabrikant:

This Deco M5 Wi-Fi System supports the 802.11ac Wi-Fi network standard and operates on both the 2.4 and 5 GHz frequencies, supporting wireless data transfer rates of up to 1300 Mbps. In addition to enhanced Wi-Fi speeds, this system also supports multi-user MIMO technology, giving users dedicated pathways to access the network, which helps eliminate bottlenecks within the router. Along with enhanced Wi-Fi connectivity, each unit within the Deco M5 system comes equipped with dual Gigabit Ethernet ports, offering a wired alternative when connecting to the network.

Seamless Wi-Fi

Immerse multiple rooms in seamless Wi-Fi connectivity with the Deco M5 Whole-Home Wi-Fi System.

Two or more Deco units work together to allow you to enjoy seamless Wi-Fi, so you can walk from room to room and always stay connected.

Monthly usage reports let you know what was blocked and where the most time was spent online.

Expansive Coverage

A single Deco unit will cover up to 2000 square feet. Two Deco units can cover up to 3800 square feet. Three Deco units can cover up to 5500 square feet. For maximum coverage, up to nine units can be added to a single Deco network. Enjoy the latest features and functionality with automatic updates.

Dedicated Deco App

The Deco app makes setup fast and easy. Download the app to your Android or iOS mobile device and it will guide you through setup and configuration with simple visuals.

Intelligent Networking

TP-Link ART (Advanced Routing Technology) keeps your network running as fast as possible by choosing the best path for each connection to follow. With its intelligent selection, ART takes the guesswork out of connecting by automatically assigning your devices to the best Deco unit and Wi-Fi band.

Optimized Connections

Deco optimizes the connections between each of its units to deliver enhanced Wi-Fi coverage, performance, and experience. Plus, with the Deco app, you can control how your bandwidth is used and prioritize devices for streaming, gaming, and video chat.

Remote Management

Remotely manage your network from anywhere with the Deco app. Get help from friends or family by adding them as network.
