

HP 22W Computer Monitor (69,99 EUR)

Locatie

Noord-Brabant, Eindhoven

<https://www.advertentiax.nl/x-1198837-z>

HP 22w is a 21.5-inch monitor for at home or at the office. You can watch movies in Full HD with this screen as well as edit documents or holiday pictures.

Thanks to the IPS panel, the image can be seen clearly from every angle, without the colors fading. The monitor is fitted with anti-glare, so you won't be bothered by the reflections of the light. The screen remains legible in an office with fluorescent lighting as well. Thanks to the thin edges around the screen, you can easily place 2 of these monitors side by side to create a larger screen space. Connect the monitor with an HDMI or VGA cable.

HDMI Cable
