28 inch monitor with AMVA panel and fast response time of 5 ms!

Hi, I'm Giacomo and I'm selling my monitor because I have to go for a 4K monitor. The condition is still perfect.

I live in Maastricht and I'm available for in-person viewing and pickup . I can also ship the package with some extra costs. I will give you my phone number if you are interested!

## Product Description

The BenQ GC2870H is suitable for daily use: surfing the internet, e-mailing, word processing and watching movies and series. A Full HD screen is the most common resolution of a monitor and offers a high image quality. With a screen diagonal of 71 cm, a 28 inch monitor is one stroke larger than an average 24 inch monitor (61 cm). The AMVA panel has high static contrast, wide viewing angle and is suitable for viewing multimedia. Compared to a TN or IPS screen, the AMVA panel has a higher contrast and a better viewing angle. For example, images of all shapes and sizes are displayed better than on TN panels, while the response time at 4 ms is still very short.

## Wide viewing angle and deep black levels

The BenQ GC2870H has a contrast ratio of 1000:1, which is a lot higher than that of a TN monitor. This ensures that colors are displayed natural and deep. The screen has a large viewing angle of 178° horizontally and vertically, making it easy for others to watch. Thanks to Flicker-Free technology, the monitor does not flicker, so it is less tiring for the eyes. For a long time, you will be less likely to suffer from irritated eyes. With a response time of 5 ms, this monitor is suitable for smooth playback of videos and games.

Our specialist recommends this monitor for:

Daily use this monitor is suitable for surfing the internet, e-mailing and word processing. Watching movies and series in Full HD. The screen has a high image quality for watching your movies and series.
