 Bought 2 years ago and carefully used since then. No dead or hot pixels. Excellent state overall.
 It does have a slight smudge on the antireflective coating, but it's only visible if you really try to find a specific angle under a very specific light that would hit it from the side (it took me some time to get that shot to show it), so it's not really visible even when the monitor is turned off and not visible at all when it is on.

Bought new for 1400€ 2 years ago, and since then it was discontinued, so hard to tell how much it would cost right now. (Tweakers price track link also leads to a weird page.)

Reason for selling: bought a newer monitor. :)

Ideally would be if you came to pick it up (Amsterdam, Oud-West); if you live in Amsterdam, I can take an Uber and bring it on my lap myself free of
