Back in 2017 I had the car imported from Japan through a official importing garage Drove the car a little while before taking it off road for a year to work on it, this is what has been done: Decided to give it a full respray and rust repair I started to strip the whole car and take each pannel off to work on it so I can do inside and outside the rear quarter panel's had rust we removed them and put it brand new ones, each pannel was sanded and blocked down then had primer which was then blocked down and primed once again, the was painted in the original crystal white 326 2k and then was lightly sanded for a nice clear coat I went extra steps as I wanted the car to look amazing. I have pictures of the work I had done if you like I can send them on request, the undercarriage is also pretty clean

In 2017 geïmporteerd vanuit Japan via een officiële import garage. Tijdje met de auto gereden en daarna een jaar aan gewerkt. Hele auto gestript, panelen losgehaald om binnen en buitenkant te kunnen bewerken. Gezandstraald, geschuurd en nieuwe primer. Nieuwe achterpanelen ingezet. Alles is opnieuw gespoten met 2k crystal white 326. Daarna licht opgeschuurd en een laatste laag doorzichtige lak gespoten. Foto's van al het werk zijn beschikbaar.
Onderstel is ook netjes en schoon.

Buitenkant vernieuwd
