Plumber for civil construction in the Netherlands

Bedrijfsomschrijving

What kind of company do I apply to now you might ask? The client is a family business from Noord-Brabant, so conviviality is guaranteed. With a club of 50 employees, they are one of the larger "house builders" in the Netherlands. With these 50 employees, they are also specialized in delivering large new-build housing projects. All the work is in-house and they deliver these projects from A to Z.

Functieomschrijving

For this client we are looking for an independent installer who can install water installations from A to Z in residential construction. The working days start around 07:00 and last until 15:30/16:00. You will work with Dutch and English speaking colleagues. It is your job to provide the houses with sanitary and central heating installations.

The activities consist of :

Laying of pipes
 Construction of drains
 Placing and installing central heating boilers
 Connecting radiators
 Assembling sanitary facilities
 Working from drawing
