

# Viseo MB4 voor Mercedes (185 EUR)

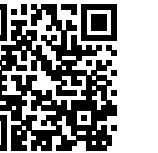

Locatie **Zuid-Holland, Dordrecht**  
<https://www.advertentiax.nl/x-1241173-z>

Nette Viseo MB4 Bluetooth cradle te koop.  
 Ideaal om de UHI aansluiting van een Mercedes te gebruiken en daarmee de auto functies zoals opnemen met de toetsen op het stuur of de radio te gebruiken maar ook nummers in te toetsen of het telefoonboek te bedienen via de auto!

Een boete is vele malen hoger!  
 Ik heb de cradle gebruikt met een Sony Experia XZ, Sony Expetra XZ2, Samsung A9 en Oppo Reno.

Te gebruiken bij diverse Mercedes!

|                                                                                                                                                                                                                        |                                                                                                                                                                                                                         |                                                                                                                                                                                                                         |                                                                                                                                                                                                                         |                                                                                                                                                                                                                          |                                                                                                                                                                                                                           |                                                                                                                                                                                                                           |                                                                                                                                                                                                                           |                                                                                                                                                                                                                           |                                                                                                                                                                                                                           |
