Divisional assistant production

Bedrijfsomschrijving

CANPACK Group is al meer dan 30 jaar actief in de markt voor metalen verpakkingen. Gedurende deze periode is CANPACK Group uitgegroeid tot een toonaangevende fabrikant in de drankverpakkingindustrie in Midden- en Oost-Europa en versterkt het voortdurend zijn marktpositie in West-Europa, Azië en Afrika

Door voortdurende investeringen en door de installatie van apparatuur op technologisch wereld niveau, zijn de capaciteit en het aanbod van verpakkingen en diensten substantieel toegenomen. Op dit moment omvat het aanbod van CANPACK Group - naast drankverpakkingen - een breed scala aan gelaste stalen blikken voor de voedingsindustrie, spuitbussen, flessluitingen, verpakkingen voor de chemische en de cosmetische industrie, glazen en plastic verpakkingen.

Door het succes van de afgelopen jaren heeft CANPACK Group zich ontwikkeld tot een moderne Capital Group en is nu een van de toonaangevende fabrikanten van metalen verpakkingen ter wereld. Bij de fabrieken van de Groep werken wereldwijd bijna 8 000 mensen. De productie bedraagt ongeveer 25 miljard drankblikken, ongeveer 28 miljard flessensluitingen, ongeveer 1 miljard metalen containers voor de voedingsmiddelen- en chemische industrie en ongeveer 700 ton glazen verpakkingen per jaar.

|                                                                                                                                                                                                                     |                                                                                                                                                                                                                      |                                                                                                                                                                                                                      |                                                                                                                                                                                                                      |                                                                                                                                                                                                                       |                                                                                                                                                                                                                        |                                                                                                                                                                                                                        |                                                                                                                                                                                                                        |                                                                                                                                                                                                                        |                                                                                                                                                                                                                        |
