For organizations looking to broaden their commitment to Citrix XenDesktop, XenApp, or VDI-in-a-Box, the new NComputing N-series thin clients for Citrix HDX deliver 100% of the HDX experience at a fraction of the cost of PCs or other thin clients. NComputing next-generation thin clients are optimized for HDX and powered by the Numo™ 3 System-on-Chip, which delivers a high performance client supporting HD video sessions using less than 5 watts of power. With full manageability, support, and at low cost, enterprise organizations can now cost-effectively extend their Citrix deployments to more users, allowing them to gain fuller access to the many benefits of desktop virtualization.

NComputing and Citrix are working together to transform the economics of desktop virtualization. With NComputing's breakthrough N-series devices and the Citrix Ready HDX Virtualization System-on-Chip, customers can extend their deployment of key virtual capabilities at dramatically lower costs and without compromising the HDX experience. Citrix and NComputing share a common vision for the evolution of the virtual experience.

The workhorse of the N-series family of thin clients, the N500, provides the rich multimedia capabilities demanded by knowledge workers and in other demanding environments. The N500 incorporates full client-side rendering for efficient playback of video content and uses server-side rendering for flash video playback. It displays content up to full HD at 1080p. The N500 also provides options for dual display and wireless connectivity. Also powered by the Numo™ 3 SoC, the N500 sets the new standard for price/performance in the thin client market with its rich set of features and capabilities.
