Selling because I received the new Macbook as a birthday present.

The computer works perfectly and has a very new keyboard and touchbar since I had to replace it because I broke the touchbar. (Apple told me that along with the new touchbar they had to replace the keyboard as well so they added a better version of the keyboard because the original one was faulty. I can find details about this repair on my email if needed)

As I said the computer is 100% functional and runs very smoothly.

The are only two signs of use and they are only cosmetic:

First one is in picture 4 (when the touchbar broke I also got a small crack on the black part of the screen next to the macbook pro text. This doesnt interfere with how the screens works at all since its not even close to the actual display.)

Second one is in picture 5 where there was a small dent created at the top right corner but again it will not interfere with your work flow at all.

For what comes with the macbook I have the original apple USB C charger and as a BONUS I will give you an original apple usb c adapter (You can see it on the last picture, normally costs 80 euros from apple) but you can have it for.
