

# Fosfaatmix - Frieschepalen (40 EUR)

Locatie **Friesland, Frieschepalen**  
<https://www.advertentiax.nl/x-1258070-z>

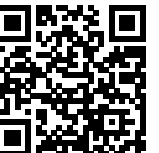

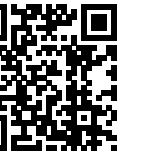

Te koop:

Fosfaatmix

Fosfaatmix is meel/poeder dat wordt verkregen door het fijnmalen van dierlijke botten. Door het gebruik van beendermeel wordt extra wortelvorming gestimuleerd en worden fosfaat tekorten opgelost. Bij de aanleg van gazons en bij aanplanten van hagen en bomen wordt beendermeel veel gebruikt. Beendermeel is verrijkt met micro organismen, komt snel vrij en werkt langdurig.

Samenstelling:  
 4% Stikstof (N)  
 25% Fosfaat (P2O5)  
 32% organische stof  
 Advies voor bemesten: 8kg per 100m2

Prijs: € 40,00 per zak van 25kg

|                                                                                                                                                                                                                           |                                                                                                                                                                                                                            |                                                                                                                                                                                                                            |                                                                                                                                                                                                                            |                                                                                                                                                                                                                             |                                                                                                                                                                                                                              |                                                                                                                                                                                                                              |                                                                                                                                                                                                                              |                                                                                                                                                                                                                              |                                                                                                                                                                                                                              |
