CNC lathe operator amp Programmer

Locatie **Gelderland, Hengelo**
https://www.advertentiex.nl/x-1261070-z

The company is a local organization with an international reputation in the development and production of shock absorbers in the car- and motorsports industry, especially in extreme environments. On a daily basis, 60 people work on realizing the goal to be the best.

Job Description
For a company, specializing in developing shock absorbers in the car- and motorsports industry, we are looking for a CNC lathe operator & programmer. You will be responsible for operating and programming CNC lathe machines. You will be working on high-end products that are used for shock absorbers and related products.
Your job consists of:

Programming, setting up, and operating CNC lathes;
Working on varied lathe operations;
Checking products for pre-defined demands.

Job Requirements

You have a vocational, technical degree;
You already have working experience as a CNC-lathe operator, and preferably as a programmer;
You can work independently and you are able to think in solutions;
You are accurate and quality-oriented.

Salary and Benefits

The company offers:

An interesting position in day shift with room for personal development;
