Digital Designs D4.200

Klasse D 4 kanaals versterker
 Frequentiebereik: 20 - 25.000 Hz
 4 x 200 watts RMS 4 ohms
 4 x 370 watts RMS 2 ohms
 4 x 550 watts RMS 1 ohms
 2 x 700 watts RMS 4 ohms mono gebrugt
 2 x 1040 watts RMS 2 ohms mono gebrugt
 Lowpass filter: 50 - 5000 Hz / 12 dB
 Subsonic filter: 30 - 5000 Hz
 RCA & auto high level inputs
 Afm: 268 x 54 x 177 mm

DD Audio info:

D Series amplifiers are compact amplifiers with full size features. The D4.200 is a bridgeable four channel amplifier with a total output of 2200 watts. It is 1ohm stereo stable making it perfect for multi driver arrays. Precision tuning is made easy with variable bandpass crossovers and LED clipping indicators. Installation is made easier with single side controls and connections, input mode switches, and auto turn-on options.

For boat, bike, and ATV applications conformal coated internal circuitry and corrosion proof switches offer increased moisture resistance. Even though the D Series amplifiers are very compact they still have a 50mm x 50mm and sports 4 channels, dual channel section, and heavy duty 100% aluminum chassis. This ensures proper heat management, proper from power output, and a smooth in-vehicle fit.
